

DAY THREE: 27th November

Sexual Harassment

Sexual harassment means unwanted conduct of a sexual nature affecting the dignity of men and women which can include unwelcome physical, verbal and nonverbal conduct.

(Aeberhard-Hodges 1996)

Story from a member of the public

This woman's evidence about her experiences is not uncommon:

I have been sexually harassed and suffered physical assault too, many times over a 30-year period. The harassment ranges from whistles and 'catcalls', to my breasts, bottom, legs and groin being touched. These events have taken place on buses and trains, while walking or standing in public places during the day, in shops and bars - anywhere where men are present, in fact.

Question:

What is your reaction to this true story?

Global Facts:

- **Gender-based violence** knows no religion, age, nationality, culture, or socio-economic class.
- **A 2019 survey of almost 31,000 people** across 40 countries found that 32% of women (18–34 year olds) in Ireland have experienced some form of sexual harassment in the previous 12 months - the second highest out of all 40 countries surveyed and the worst in Europe. Only Mexico fared worse at 43%. (The Irish Examiner - March 2019)
- **A Plan International UK survey** has found that shockingly, 52% of girls and young women aged 14-21 in Wales, have experienced unwanted sexual attention/physical contact, or indecent exposure in public. 17% have been touched, groped or grabbed. A huge 37% said they have been followed in public. (April 29th 2019)

"Today in many places we hear a call for greater security. But until exclusion and inequality in society and between people is reversed, it will be impossible to eliminate violence." (Pope Francis: 'Evangelii Gaudium' 59)

Laudato Si

In Pope Francis' encyclical to the world in 2015, he clearly values creation and life -

"Human life itself is a gift which must be defended from various forms of debasement" LS 15

BEFORE

THE CORONA VIRUS PANDEMIC

243 million women and girls, aged 15-49, experienced sexual and/or physical violence by an intimate partner in the past year.

SINCE THE PANDEMIC

violence against women, especially domestic violence, has intensified.

EXACERBATING FACTORS INCLUDE

security, health and money worries, cramped living conditions, isolation with abusers, deserted public spaces, limited access to support services.

In some countries, resources and efforts have been diverted from violence against women response to immediate COVID-19 relief.
